An aerial photograph of a forested landscape with a topographic map overlay. The map shows contour lines in shades of brown and yellow, indicating elevation changes. The forest is a deep green color. A semi-transparent black rectangle is overlaid on the center of the image, containing the title and three bullet points.

GFW-Biodiversity?

GFW-Biodiversity?

Combine near-real-time deforestation alerts with best-available global biodiversity datasets

For example

- Global species richness & endemism data
- Alliance for Zero Extinction Sites
- Priority habitat maps for focal endangered species

GFW-Biodiversity?

Combine near-real-time deforestation alerts with best-available global biodiversity datasets

For example

- Global species richness & endemism data
- Alliance for Zero Extinction Sites
- Priority habitat maps for focal endangered species

Produce monthly & annual reports on status of key biodiversity features

For example

- Zero Extinction Sites
- Protected areas
- Annual state of the tiger report

GFW-Biodiversity?

Combine near-real-time deforestation alerts with best-available global biodiversity datasets

For example

- Global species richness & endemism data
- Alliance for Zero Extinction Sites
- Priority habitat maps for focal endangered species

Produce monthly & annual reports on status of key biodiversity features

For example

- Zero Extinction Sites
- Protected areas
- Annual state of the tiger report

Identify “potential go areas” (PGAs) for agricultural development

For example

- Map degraded, low-biodiversity areas suitable for agriculture
- Integrate with GFW-Commodities to add biodiversity dimension to commodities siting
