Implementing the Ocean SDG: from knowledge  
to action

500 million people  
\$1 Trillion asset value  
Over 50 nations

50% loss in  
30 years

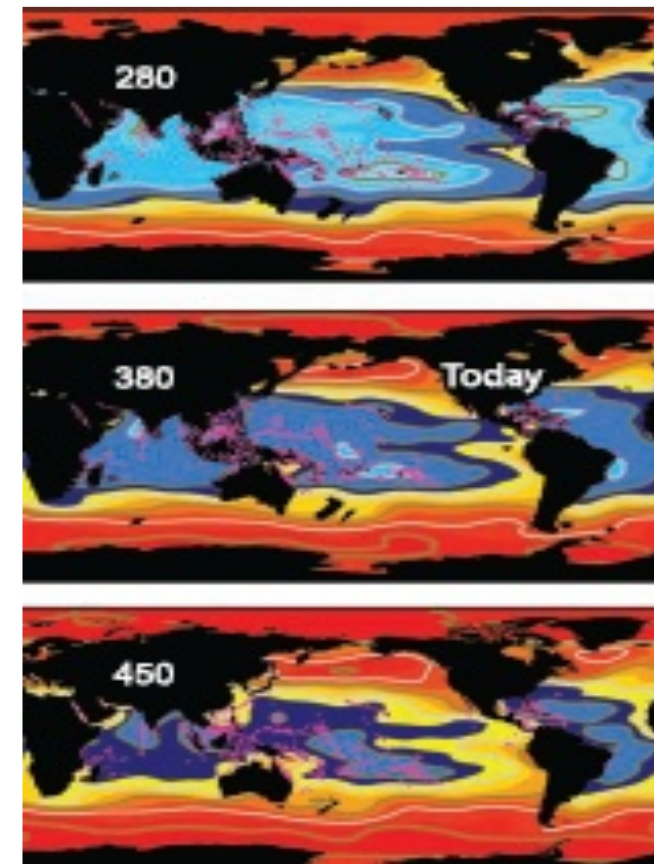

## Coastal development

## Over-exploitation

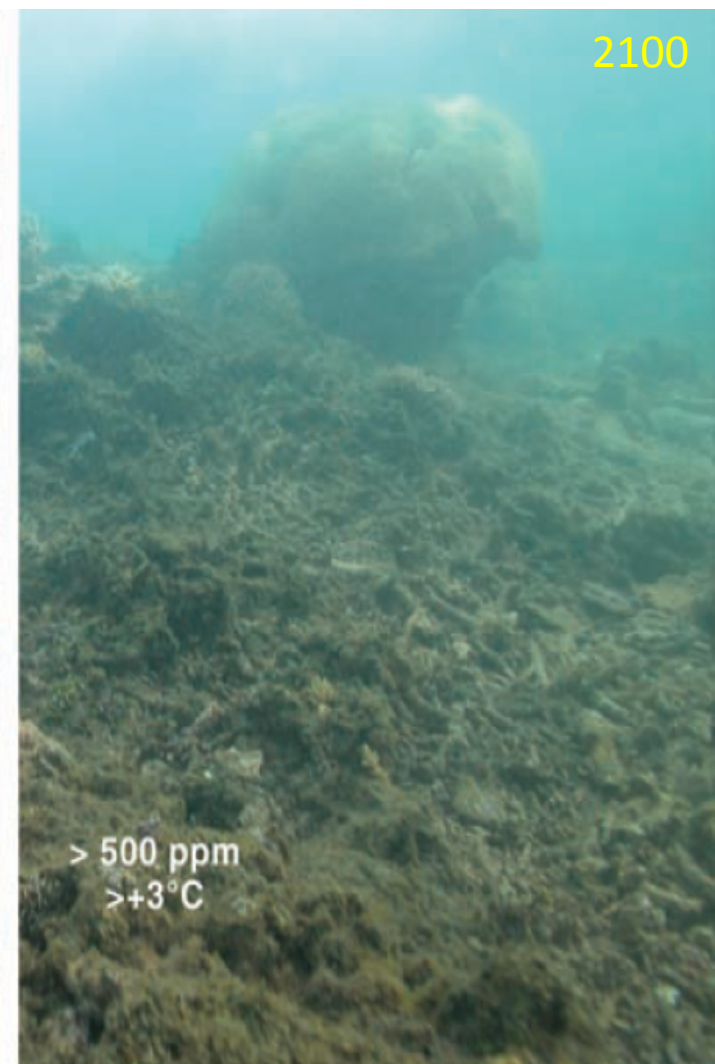

## Climate change

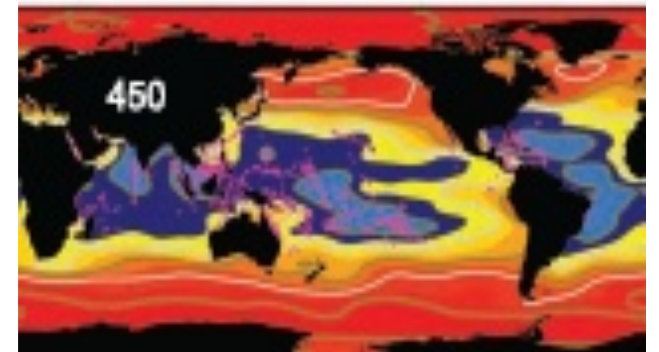

# *Into the next 30 years?*

# *Five main goals and solutions to coral reef crisis*

1. Mainstream the economic value of coral reefs in national accounts
2. Rebuild coral reef fisheries to ecologically sustainable harvest levels.
3. Protect 30% of coral reefs in well managed no-take areas.
4. Reinvent public-private partnerships
5. Avoid dangerous climate change by keeping average global surface temperatures well below 2°C
